

Coagulation Test Tables with Schedule

Call Client Services 804-828-PATH (828-7284); 1-800-363-9234

Test Requirements Test Schedule	Results Availability
Activated Partial Thromboplastin (APTT) ¹ sodium citrate tube 24 hrs/day, 7days/week	1 hour after receipt for STAT 2 hours after receipt for Routine
Mixing Studies (PT+PTT) ² sodium citrate tube 24 hrs/day, M-F	Results available within 24 hours (M-F)
Activated Protein C Resistance (APCR) ² sodium citrate tubes Batched weekly	within 7 days or less
Antithrombin III ¹ sodium citrate tube Monday-Friday, 9am-2pm	in 24 hours
D-Dimer, Quantitative ¹ sodium citrate tube 24 hrs/day, 7days/week	1 hour after receipt for STAT 2 hours after receipt for Routine
Factor II Assay ¹ sodium citrate tube Monday-Friday, 9am-2pm; 24 hours upon emergency approval	Results available in 24 hours (M-F)
Factor V Assay ¹ sodium citrate tube Monday-Friday, 9am-2pm; 24 hours upon emergency approval	Results available in 24 hours (M-F)
Factor VII Assay ¹ sodium citrate tube Monday-Friday, 9am-2pm; 24 hours upon emergency approval	Results available in 24 hours (M-F)
Factor VIII Assay ¹ sodium citrate tube Monday-Friday, 9am-2pm; 24 hours upon emergency approval	Results available in 24 hours (M-F)

Factor IX Assay1 sodium citrate tube Monday-Friday, 9am-2pm; 24 hours upon emergency approval	Results available in 24 hours (M-F)
Factor X Assay1 sodium citrate tube Monday-Friday, 9am-2pm; 24 hours upon emergency approval	Results available in 24 hours (M-F)
Factor XI Assay1 sodium citrate tube Monday-Friday, 9am-2pm; 24 hours upon emergency approval	Results available in 24 hours (M-F)
Factor XII Assay1 sodium citrate tube Monday-Friday, 9am-2pm; 24 hours upon emergency approval	Results available in 24 hours (M-F)
Factor Inhibitor Screen1 sodium citrate tube Monday-Friday, 9am-12noon	in 1-2 days
Factor Inhibitor Titre1 sodium citrate tube Monday-Friday, 9am-12noon	in 1-2 days
Fibrinogen1sodium citrate tube 24 hrs/day, 7days/week	1 hour after receipt for STAT 2 hours after receipt for Routine
Heparin Assay Low Molecular Weight Heparin1sodium citrate tube Monday-Friday, 9am-1pm	Results available same day if received by 1pm (M-F)
Heparin Assay Unfractionated Heparin1sodium citrate tube Monday-Friday, 9am-1pm	Results available same day if received by 1pm (M-F)
Plasminogen1 sodium citrate tube Batched weekly	in 1 week or less
Platelet Aggregation3 (4.5 ml draw) sodium citrate tubes Tuesday and Wednesday (Test Must Be Scheduled)	same day

Platelet Function Assay (PFA) four 4.5 mL, light blue-top citrate tubes. The tubes must not be refrigerated or passed through the pneumatic tube system. The tubes must be hand-delivered to the Hemostasis Laboratory within one hour of collection. Monday-Friday, 8:30am-1:30pm. The test is NOT available on an emergency basis at this time.	within one hour after the specimen is received in the laboratory
Protein C Activity1sodium citrate tube Batched weekly	in 1 week or less
Protein S Activity1sodium citrate tube Batched weekly	in 1 week or less
Prothrombin Time (PT)1sodium citrate tube 24 hrs/day, 7days/week	1 hour after receipt for STAT 2 hours after receipt for Routine
Reptilase1sodium citrate tube Monday-Friday, 8am-3pm	Results available within 24 hours (M-F)
Thrombin Time1sodium citrate tube Monday-Friday, 8am-3pm	Results available within 24 hours (M-F)
Von Willebrand Factor Antigen (vWF Antigen)1sodium citrate tube Batched every week	in 1 week or less
Von Willebrand Factor Assay (vWF Assay)1sodium citrate tube Batched weekly	in 1 week or less
