

Tracking Stress Signaling in Triple Negative Breast Cancer

Carol A. Lange, PhD

Professor

Departments of Medicine and Pharmacology

Director, Cell Signaling Program

Director, Cancer Biology Training Program (NCI T32)

University of Minnesota, Masonic Cancer Center

University of Minnesota

Educational Objectives

At the conclusion of this activity, the learner should better be able to:

1. Does life stress impact breast cancer risk? Describe how.
2. How do cells in breast tissue interpret life stress? (What is the major steroid hormone?)
3. What is meant by "cellular stress"?
4. What are the primary cell signaling pathways that sense cellular stress?
5. What are some new molecular targets for development of improved (targeted) therapies designed to block stress signaling in breast cancer?

University Health Services Professional Education Programs (UHS-PEP) of VCU Health System is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. UHS-PEP designates this live activity a maximum of 1 AMA **PRA Category 1 Credit**[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

VCU Pathology, Richmond and University Health Services Professional Education Programs (UHS-PEP) of VCU Health System indicate that there is no commercial support for this activity.

In compliance with the Accreditation Council for Continuing Medical Education (ACCME) *Standards for Commercial Support of CME*, University Health Services Professional Education Programs (UHS-PEP) of VCU Health System discloses all relevant relationships which program faculty and planners report having with commercial interests whose products or services they may discuss during their presentation, or that they may select as topics for presentation.

The speaker for today has no relevant relationships to disclose/has the following relevant relationships to disclose.

The members of the planning committee and/or UHS-PEP staff have no relevant relationships to disclose/have the following relevant relationships to disclose.

In compliance with the ACCME *Standards*, all relationships reported above have been resolved according to VCU's Policy on Conflict of Interest. All presenting faculty affirm that they will employ the best available evidence from all sources to support any clinical recommendations made in their presentations. If learners detect any commercial bias in any presentation, they should document their observations on the Activity Evaluation Form.

Virginia Commonwealth University is an equal opportunity/affirmative action institution providing access to education and employment without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran's status, political affiliation or disability.
