

## New workflow for requesting NIPT 22q results when an NIPT (13,18,21,X,Y) test has already been completed

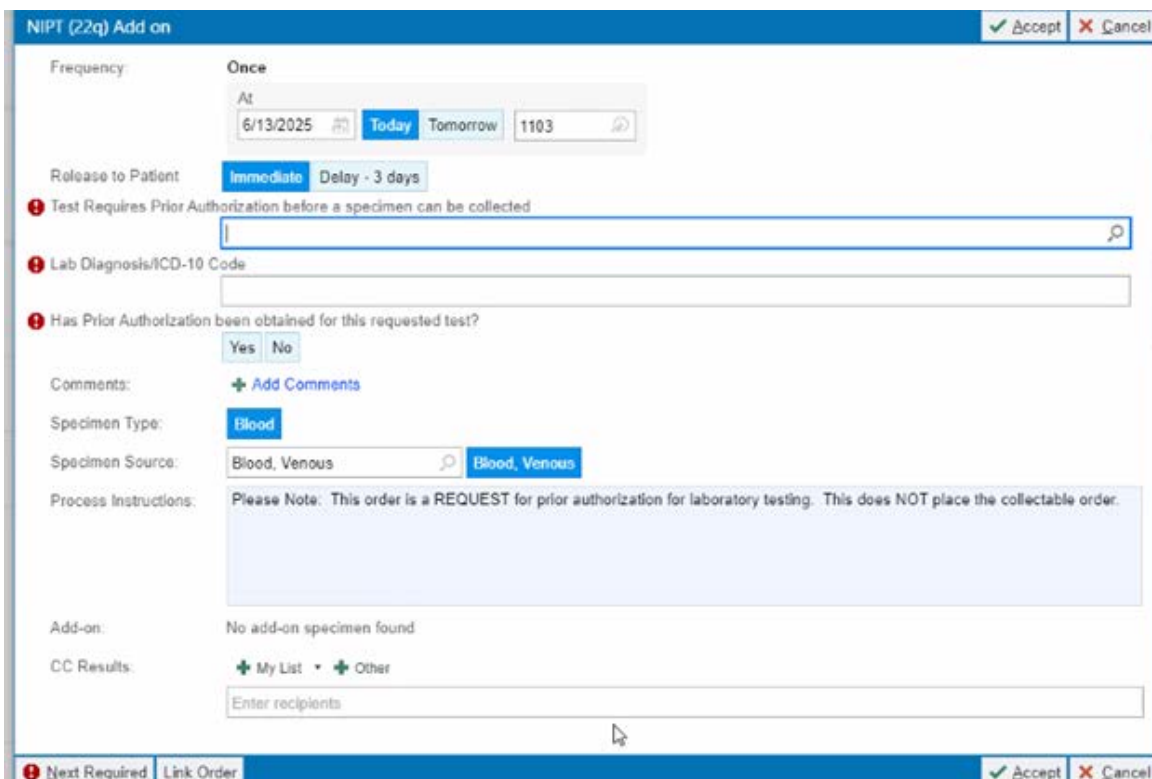

**Orderable: "NIPT 22q Add-On Request" test**

**Beginning June 24<sup>th</sup>, 2025, the Molecular Diagnostics Laboratory will receive this add-on request.**

**Background:** When providers request the 22q11.2 deletion results for patients who had the NIPT Aneuploidy test completed, they now can order the "NIPT 22q Add-On Request" test in Epic. The lab retrieves the relevant 22q11.2 deletion results from the previously completed test (no new blood draw) and uploads them to the "NIPT 22q Add-On Request" order in Epic.

### Epic ordering process:

1. Order NIPT (22q) Add on Request.
2. Fill out the Pre-Authorization from that pops up with the order.

**NIPT (22q) Add on** [Accept] [Cancel]

Frequency: **Once**

At: 6/13/2025 [Today] [Tomorrow] 1103

Release to Patient: **Immediate** [Delay - 3 days]

Test Requires Prior Authorization before a specimen can be collected

Lab Diagnosis/ICD-10 Code

Has Prior Authorization been obtained for this requested test?  
[Yes] [No]
