Type 1 Interferons Promote Alloimmune Responses to Transfused RBC Antigens

David Gibb, MD, PhD
Transfusion Medicine/Blood Bank Fellow
Department of Laboratory Medicine
Yale University

Educational Objectives
At the conclusion of this activity, the learner should better be able to:
1. To recognize the clinically significant implications of RBC alloimmunization
2. To review the role of inflammation in immune responses to RBC transfusion
3. To examine the role the interferon response in promoting RBC alloimmunization

Accreditation: VCU Health Continuing Medical Education of Virginia Commonwealth University Health System is accredited by the Accreditation Council for Continuing Medical Education (ACCME®) to provide continuing medical education for physicians.

Credit Designation: VCU Health Continuing Medical Education of Virginia Commonwealth University Health System designates this live activity for a maximum of 1.00 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
