ONCOGENIC SYNAPSES: stromal regulators of PDAC metabolic support & innate immunosuppression

Edna Cukierman, Ph.D.
Associate Professor, Cancer Biology
Institute for Cancer Research
Co-Leader: Marvin & Concetta Greenberg Pancreatic Cancer Institute
Co-Director: Immune Monitoring Facility
Fox Chase Cancer Center

At the conclusion of this activity, the participant will be able to:

1. Understand the importance of stromal matrices in tumor progression
2. Understand the role that pancreatic cancer associated fibroblasts (and corresponding matrices) play in nutritional support of pancreatic cancer cells
3. Understand the role of cancer associated fibroblasts and corresponding matrices in maintaining a pro-tumoral immunosuppressive environment
