Myeloid neoplasms with germline predisposition: a case report and overview of the WHO 2017 classification system

Susan Harley, MD
Hematopathology Fellow
Department of Pathology

At the conclusion of this activity, the participant will be able to:

1. To understand the significance of identifying those myeloid neoplasms which occur in the setting of germline mutations and/or familial syndromes.
2. To recognize individuals in whom the possibility of germline predispositions for myeloid neoplasms should be considered.
3. To understand the three main germline predisposition classifications and review the main associated mutations and characteristics of each.
