TGFbeta-mediated Epithelial-mesenchymal Transitions in Cancer

Philip H. Howe, Ph.D.

Professor & Chair
Hans & Helen Koebig Chair in Clinical Oncology
Department of Biochemistry & Molecular Biology

At the conclusion of this activity, the participant will be able to:

1. Explain how TGF-beta signaling is integrated in cells under both physiological and physiopathological conditions
2. Provide a mechanistic model to improve our understanding of the roles of RNA binding proteins in TGF-beta-mediated cell invasion and metastasis
3. Describe how epithelial-mesenchymal transitions contribute to cell migration and metastasis driven by the TGF-beta signaling pathway

Accreditation: VCU Health Continuing Medical Education of Virginia Commonwealth University Health System is accredited by the Accreditation Council for Continuing Medical Education (ACCME®) to provide continuing medical education for physicians.

Credit Designation: VCU Health Continuing Medical Education of Virginia Commonwealth University Health System designates this live activity for a maximum of 1.00 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
