"Correlation of histologic patterns and mucinous component with molecular alterations in pulmonary adenocarcinoma"

Liu Liu, MD, PhD  
Cytopathology Fellow  
VCU School of Medicine

At the conclusion of this activity, the participant will be able to:

1. Review the classifications of histologic patterns of pulmonary adenocarcinoma, including the newly described "filigree" pattern  
2. Discuss the correlation between mucinous component and molecular profile in lung adenocarcinoma  
3. Describe common molecular alterations in lung adenocarcinoma
