Pedro L. Fernández, University Autònoma of Barcelona, Spain

Answer to Case 147:

Diagnosis: Greenstick fracture, probably occurred during the infantile age (absence of a true callus).

Submitted by: Dr. Valentina Giuffra, University of Pisa, Italy.

The slide of Case #147 can be best viewed and printed in Internet Explorer 6.0 at:

<https://pathology.vcu.edu/research/research-labs/gerszten-lab-research/case-studies/147/>

Case 148:

History: Skull from Chanka Culture, Andahuaylas, Peru (ca. AD 1150-1250)

Submitted by: Danielle S. Kurin, University of California, Santa Barbara, CA

The slide of Case 148 can be best viewed and printed in Internet Explorer 6.0 at:

<https://pathology.vcu.edu/research/research-labs/gerszten-lab-research/case-studies/148/>

Notice!

1. If you have an interesting slide you would like to share with other members, please send it along with the history.

2. We published an "Atlas" of Paleopathology, which is a synopsis of 40 years of investigation in South American Mummies. This publication is available at CAP Press, Northfield, IL, 60093, phone: 800-323-4040 option 1, and is directed mainly at those interested in Archeology, Anthropology, History of Medicine, Forensic Pathology and Pathology (Cost \$35.00).
